KMI KOREA MARITIME INSTITUTE

Invitation

Under the theme of 'Global Ocean Governance and the Contributions of International Organizations', Korea Maritime Institute is holding the 2019 Global Ocean Regime Conference on May 9th and 10th at Lotte Hotel, Seoul. This event will serve as an invaluable opportunity to assess international organizations' contribution to global ocean governance, while reviewing future tasks upon us.

This year's Global Ocean Regime Conference is especially meaningful as it is being held as one of the projects for marking the centennial anniversary of both the March First Independence Movement of 1919 and the establishment of the Korean Provisional Government. Therefore, this conference commemorates the noble aspiration of independence and peace pursued by those seeking Korea's independence 100 years ago.

This year also marks the 25th anniversary of the United Nations Convention on the Law of the Sea being taken into effect. Until now, the UN Convention of the Law of the Sea has served as a central role in maintaining the international maritime order and resolving conflicts in a peaceful manner. Moreover, successful settlement of the Law of the Sea Convention is attributed to continuous efforts made by international organizations relevant to the oceans.

Today, the global ocean environment is rapidly changing due to climate change and the development of science and technology, increasing the potential for new conflicts and disputes in the oceans. As a result, international organizations in the realm of the oceans are taking on many tasks for the establishment of a peaceful global ocean governance.

This year's Global Ocean Regime Conference aims to seek solutions to these challenges participated by major ocean-related international organizations, namely, the International Tribunal for the Law of the Sea (ITLOS), the UN Commission on the Limits of the Continental Shelf (CLCS), the International Seabed Authority (ISA), the International Maritime Organization (IMO), the UN Food and Agriculture Organization (FAO), and the UN Division for Ocean Affairs and the Law of the Sea (DOALOS).

I sincerely ask for your attendance in discussing a peaceful global ocean governance.

Yang Chang-ho

President of Korea Maritime Institute
